

NON ELECTRIC & HIGH PERFORMANCE

The new Genus CA Water Softener range from Dolphin Water Solutions offers installers an easy and simple installation without the need for any kind of electrical supply.

“This is a new competitively priced non electric and compact unit with a great performance” says Business Development Manager Steve Davis, “its exactly what the installers have been telling us they need, and we have delivered it ”

Both models in the range offer a high capacity in a neat compact size, the CA300 model suitable for families up to 3 people together with the larger more popular CA500 model capable of accommodating a family up to 8, all within a total unit height of between 460mm to 550mm.

Each model is also available as a hi flo option, so can easily cover any domestic household situation and comes with a 10 year no quibble guarantee available, subject to terms & conditions and this is covered nationwide by Dolphin’s own domestic engineers, not outside contractors

Manufactured in the UK, supported by a technical helpline and a comprehensive sales brochure, Dolphin’s unrivalled product for the installer is without parallel and ensures many years of trouble free soft water for your total peace of mind.
